

A

Distance: how far ...

British people buy most things in metres, centimetres and millimetres, but they still often talk about distance using the old system of **miles** [1 mile = about 1.6 kilometres], **yards** [1 yard = almost 1 metre], **feet** [1 foot = 30 centimetres], and **inches** [1 inch = 2.5 centimetres].

Common **mistakes**

It's ten minutes' walk from here. (NOT ten minutes' walking.)
It's a long way. (NOT It's far.) But we can say 'No, it isn't far.'

B

Dimensions: how long or wide ...Common **mistakes**

Mason is quite **tall** (NOT quite high). It's a **tall** tree/building (NOT a high tree/building). It's a **high** mountain (NOT a tall mountain).

We can ask about the dimensions like this:

What's the **length** of the garage? OR How **long** is the garage?

What's the **width** of the path? OR How **wide** is the path?

What's the **height** of the wall? OR How **high** is the wall?

What's the **depth** of the pool? OR How **deep** is the pool?

It's five metres (**long**).

It's a metre (**wide**).

It's two metres (**high**).

It's three metres (**deep**).

C

Size: how big or small ...

We use a range of adjectives to describe the size of something.

It was a very **thick** book – over 500 pages. (*opp* a **thin** book)

Their living room is **huge** [very big; *syn enormous*; *opp* a **tiny** room].

We caught a **giant** crab. [very large or bigger than other similar things]

It was a very **narrow** road for a bus. (*opp* a **wide** road)
